

Injury bills on an own-damage file

Internal circular CL-22

This circular is a PDF. It is not a row in the policies table.

1. Name the bill

When an own-damage file also carries a third-party injury bill, call that bill a separate injury note. The words separate injury note are defined only in this circular.

2. How to record it

Record the bill amount from Policy Record. Refer the separate injury note to the senior examiner. Do not add the injury bill to the garage estimate. Do not treat the injury bill as own damage.

3. What this circular does not do

This circular does not replace Policy Record. Exclusion 4 and circular CL-17 still come from the policy row. A licence that lapsed within 30 days stays a referral under CL-17. This circular is not a reason to pay a claim and not a reason to decline a claim. A file with no injury bill is not a separate injury note.
